Summary

Full-stack software engineer with 9+ years of hands-on experience, including independent and personal-project work before moving into formal engineering roles, and 5+ years of that spent on AI and machine learning architectures, including agentic development with Claude Code and Codex. I like owning a feature end to end, from the database schema all the way to a polished UI, and I'm just as comfortable leading a small team, mentoring other engineers, or wiring up a third-party API or payment system. Right now I'm building GlideProject, a B2B partner-management platform, at Vibgyor Interiors. My background also touches blockchain, DevOps, and cybersecurity.

Experience

Software Engineer, Vibgyor Interiors

Jan 2025 – Present

Bengaluru, India (on-site)

- Building **GlideProject**, a B2B partner-management platform, using React 19, TypeScript, TanStack Start, Node.js, Express, MongoDB, and Cloudflare Workers, with Razorpay-powered payments.
- Developing, testing, debugging, and documenting software solutions for interior design and partner workflows, improving design and operational efficiency.
- Working directly with designers and stakeholders to turn business requirements into shipped application features.
- Running code reviews and troubleshooting production issues to keep releases high-quality and reliable.

Lead Software Engineer, Techzen Academy

Mar 2023 – Jun 2025

Chennai, India (remote)

- Led complex application development projects end to end for educational platforms.
- Integrated third-party APIs to extend functionality and improve the user experience.
- Ran code reviews and mentored junior engineers, raising coding standards across the team.

Senior Software Engineer, Verus Foundation

Jun 2020 – Aug 2023

San Francisco, USA (remote)

- Built applications using HTML, CSS, JavaScript, and other languages to support community-driven, nonprofit-facing projects.
- Maintained and modernized the existing codebase, improving functionality and performance.

Independent Developer, Personal Projects

2017 – Jun 2020

Bengaluru, India

- Built and shipped independent full-stack and early AI/ML projects while teaching myself web development, blockchain, and systems programming from the ground up.
- Laid the technical foundation that carried into formal engineering roles afterward.

Independent Projects

Pocket (in active development, nearing launch)

In plain terms, Pocket lets one person run a whole "team" of AI helpers from their phone or laptop. Each helper specializes in one job, like research, writing, or coordination, and a built-in "Chief of Staff" assistant keeps them all organized and working together, the way a manager would. I'm designing and building this solo, end to end: the website, the app itself, and the AI logic behind it, using React 19, TanStack Start, Node.js, and MongoDB, with a distinctive coral-branded look and India-first pricing.

NexPath *(in final stages of development)*

NexPath is an AI career advisor. It talks you through career questions the way a real mentor or counselor would, except it's available any time and tailors its advice to you. It also pulls relevant career and industry news into one clean feed, so users stay up to date without hunting across multiple sites. I'm co-building this with a partner, handling the product and engineering side.

Projects on GitHub

Vibgyor-Presales-Talktime	A large presales system for Vibgyor: dashboard, a talktime mobile app for mapping partners, a brand-partner dashboard, and a unified API tying it all together.
Portfolio	Source code for my personal portfolio site.

Skills

Frontend	React 19, TypeScript, Angular, System Design, UI Development
Backend	Node.js, Express, TanStack Start, MongoDB, Cloudflare Workers, Razorpay
Languages	Java, Python, JavaScript, SQL
AI / ML	Prompt Engineering, LLM Integration, AI Agent Architecture, RAG Pipelines, Claude Code, Codex
Practices	API Integration, Machine Learning, Agile / Scrum, Code Review

Education

Computer Science
MES PU College of Arts, Commerce & Science
Graduated

Certifications

Agile Expert Certificate of Proficiency, IBM	Strategic Planning in the AI Age, HP LIFE
Agile Project Management Certifications, HP LIFE	JSM Fundamentals with AI, Atlassian
Software Engineering and Agile Software Development, Infosys	Data Science and Analytics, HP LIFE
Agile Scrum in Practice, Infosys	Intro to SQL, Kaggle
Project Management Fundamentals, IBM	JavaScript, freeCodeCamp
AI Fundamentals: Foundations for Understanding AI, IBM	Foundation in AML and KYC, KYC Lookup
Getting Started with Generative AI, IBM	Professional Networking for Career Growth, HP LIFE
AI for Business Professionals, HP LIFE	Resume Writing and Job Interviewing, HP LIFE
	Introduction to Cybersecurity Awareness, HP LIFE

Languages

Kannada	Native
English	C2, proficient
Hindi	C2, proficient
